Subject: Microsoft Settlement

The United States should settle with Microsoft now. Impose reasonable restrictions on the company and let everyone go back to work doing what they do best. Monetary penalties should be kept to a minimum. There is more important work to be done for the good of the Country. Greed should not be rewarded. The States should join the Federal settlement. Holding out to further appease the various special interests is not warranted except to exploit the situation and to extort money nefariously.
